Overview of GAB Technical Information

For Technical Information marked with ...i please contact us directly: info@gab-neumann.de or +49 7622 67510

TI	Content
001	Water Hammer from Fast Acting Valves
002	Safety Equipment Layout for Protecting Graphite Heat Exchangers from Pressure Shocks
003	Load Cycle Stability for Phenol Resin-impregnated Graphite
004	Easy Mechanical Cleaning of Block Heat Exchangers
016	Pressure Shocks from Air Bubbles in the Coolant
017	Average Overall Heat Transfer Values (U)
020	Internal Stress from Organic Solvents
021	GMP compliant Annular Groove Condensers
022	Maximal Allowable Temperature Difference
025	Material List for GMP Compliant Annular Groove Condensers
026	GMP Design - Guidelines
028i	CIP - Cleaning in place
029i	cGMP Compliance for Graphite, Impregnation and Cement
030	Preventing Thermal Shocks to Overheated Heat Exchangers
031i	Certificate for GMP Condensers
033	Contaminants Adhesion to Various Materials
035	Carbon Fibre Reinforcement for Annular Groove Heat Exchangers
036i	CIP Sprayball
037	GPX Graphite Corrosion Resistance to Bromine and Bromine Compounds
041	Graphite Condensers: Annular Groove vs. Block Design
042	Connecting to Glass Piping

GAB Neumann GmbH | Alemannenstrasse 29 | D-79689 Maulburg

Overview of GAB Technical Information

TI	Content
043i	CIP Cleaning of Graphite Condensers
044	Radial Nozzles Protection
045	Perspiration Water Drain Duct
046	Desublimation Processes with Annular Groove Equipment
047	GAB Service for Process Equipment Cleaning during Shut Down
048i	Leakage Detection System for SE Series SiC Shell & Tube Heat Exchanger
049	Sealing System Configuration for SR Series SiC Shell & Tube Heat Exchangers
050	Turbulence Modules for Silicon Carbide Shell & Tube and Block Heat Exchanger
051	Two-Stage CORRESIC Shell & Tube Condense
052i	Sectional View of a CORRESIC Tube Sheet-SiC Tube Sealing System
053i	GAB CPX-Impregnated Amorphous Carbon for Preventing the Abrasion of Graphite Equipment
054i	Corrosion Tables, Korrosionstabelle, Tables de corrosion
055i	Liquid-cooled Header for Applications with Hot Gas
070	GAB HX Type PTFE Bellows in Compliance with GAB Works Standard 1070/1270
071	GAB HX 1070-1270 Type PTFE Bellows, and Compatibility with GAB 1060/1260 Bellows
